

Week 1 – Understanding the Business Problem

Requirement Analysis for an Online Shopping Platform

Introduction

An online shopping platform such as Amazon or Flipkart allows customers to purchase products from anywhere using the internet. The system connects customers, sellers, payment gateways, and delivery services to provide a smooth shopping experience. The main goal is to make product purchasing simple, secure, and convenient.

Major Activities in an E-Commerce System

1. Customer Registration

2. Users create an account using their name, email, phone number, and password.
3. Registered users can log in, manage their profile, and view their order history.

4. Product Browsing

5. Customers can search products by name, category, or brand.
6. Products are displayed with images, descriptions, prices, ratings, and reviews.

7. Shopping Cart & Order Placement

8. Customers add products to the shopping cart.
9. They can update quantities, remove items, and proceed to checkout.
10. The system calculates the total amount, including discounts and delivery charges.

11. Payment Processing

12. Customers can pay using UPI, debit/credit cards, net banking, cash on delivery, or digital wallets.
13. The payment gateway securely verifies the transaction and confirms the payment.

14. Shipment Tracking

15. After order confirmation, the product is packed and shipped.

16. Customers receive tracking updates and can monitor the delivery status until the product is delivered.

Functional Requirements

- User Registration and Login
- Product Search and Category Filter
- Product Details with Images and Reviews
- Shopping Cart Management
- Secure Online Payment
- Order Confirmation and Invoice Generation
- Shipment Tracking
- Order History and Cancellation
- Customer Support

Conclusion

An e-commerce platform integrates customer management, product catalog, order processing, secure payment, and delivery tracking into a single system. These functionalities help provide a fast, reliable, and user-friendly online shopping experience while improving business efficiency and customer satisfaction.
